RFID POKER SOLUTION

RFID Poker Solution

Tableswin RFID Poker Solution is an innovative system that combines an RFID antenna, an RFID Reader, and a management software that enables the full automation of a Cash Game Poker Table.

RFID Poker Solution automatically calculates POT amount, RAKE amount and NET WIN amount.

RFID equipment is invisibly installed into the poker table in combination with a touch-screen tablet PC and with our easy-to-use Tableswin Poker Table Solution Software that reads and validates a large quantity of gaming chips, enables fast and accurate pot scanning, eliminates dealer errors by instantly calculating pot, rake and net win, protects your assets from frauds and illegal activities identifying counterfeit chips, reduces game down time by minimizing delays, making it possible to generate many additional rounds per hour, and to increase game speed and incomes by up to 30%.

Tableswin poker table solutions increase table efficiency and game speed while simultaneously eliminating costly calculation mistakes and reducing the downtime between games, enhance your poker table management processes by providing you a wide range of reports and statistics giving you the information necessary to maximize your casino's efficiency. This information can be used to identify the most profitable hours of play. The reports can be sent daily to external gaming authorities, if required.

We also offer a progressive jackpot module to increase the performance of poker tables and a wide range of optional.

Functions

AUTOMATED PROCESSES:

- Automatic chip count.
- Automatic Pot and Side Pot calculation.

PROGRESSIVE JACKPOT

“PROGRESSIVE JACKPOT”
SOFTWARE APPLICATION MODULE

“Progressive Jackpot” is an additional and optional software application module of GTI Cash Game Poker Table System.

Progressive Jackpot Module enables casino to form a poker table progressive jackpot that greatly increase attractiveness of casino poker tables and that gives to the players an amazing progressive prize where they can win all or part of an incremental jackpot. Introducing a Progressive Jackpot makes casino poker tables more profitable by keeping poker player at the table hoping to win an extra prize.

The impact on casino cost or the contribution is zero because jackpot is calculated and collected on pot amount unless the house offers the initial jackpot amount or a minimum jackpot is guaranteed.

CONCEPT

Tableswin Cash Game Poker Table System “Progressive Jackpot” module adds more suspense, thrill and excitement for players because the jackpot winning chances are not related to a specific event of the game but are totally random and unpredictable.

Progressive Jackpot application has been developed to calculate automatically, in accordance to setting parameters that could be fully customized, as an additional extra amount (fixed of percentage) or as “side bet” in excess of standard rake on each POT amount, accruing collected amount to the jackpot round after round, day after day. When dealer closes a round, subject to setting parameters, decided by casino, Jackpot could be awarded by the system in a “slot machine concept” using a complex algorithm method in a totally random and unpredictable way to the winning player. Player wins pot plus the progressive jackpot. Progressive Jackpot software module can operate on a single stand-alone poker table or it can link a poker tables network to drive a higher jackpot. Casino can calculate collected RAKE amount before awarding the jackpot in advance.

With Progressive Jackpot module "ON" the game activity TV display provides in any desired graphic layout, following jackpot information:

- Progressive jackpot total amount accrued up to date.
- Progressive jackpot amount collected in that single round.
- Last Jackpot winning awarded

In case of jackpot winning a "Las Vegas Style" graphic animation, fully customizable, like a slot machine is displayed on the screen with the amount of awarded jackpot.
System is connected to a printer. Floor man can print out a ticket for player to collect Jackpot at the redemption window.
